

# Ari Neugroschl

## 25+ Years of IT and Global Financial Transparency Experience

Ari is a visionary, entrepreneurial IT executive, with over 25 years' experience providing enterprise-wide leadership, guiding strategic direction and transformational decision making in business and technical initiatives. Ari drives large and complex IT organizations to enable agile innovation, business growth and operational excellence.

Ari earned his BA in Economics from Yeshiva University.

### Highlights

- Leverages a collaborative style to build and lead high-performing cross-organizational teams to architect, implement, manage and streamline intricate IT designs.
- Architected and led projects in infrastructure, cybersecurity, ERP and CRM solutions to enable strong collaboration and efficiency gains, while simultaneously strengthening the security position and resiliency of systems and processes.
- Partnered with business leaders driving custom system development to support the corporate roadmap, enable nimble business decisions and visibility, while maintaining proper IT governance and controls.

### Professional Experience

- **Cybersecurity:** Protecting franchise reputation through system, data security and cybersecurity assessments, while using controls & system implementations to mitigate risk.
- **Infrastructure:** Architecting and realizing corporate infrastructure to maximize communication efficiencies, secure critical assets, minimize vulnerability areas and lower risk profiles.
- **Mergers & Acquisitions:** Due diligence pre/post-merger and acquisition integration, defining tactical direction, business operations insight and material cost savings across the global corporate landscape.
- **Corporate Leadership:** Outstanding communicator who presents critical, technical information to all levels, including organizational town halls and board presentations.
- **ERP and CRM Solutions:** Designing and introducing ERP and CRM systems to reengineer processes, procedures and communications for corporate efficiencies and turnarounds.
- **Custom Systems:** Partnering with business leaders to design, develop, and rollout global systems to transform and elevate corporate agility, visibility and compliance.
