Operations Management – Business Analyst — Project Management

Mr. Carr is a transformative business leader with experience in business operations management as well as data analytics. For over 30 years he has had success running his private Data Analytics company and running operations on a publicly held technology firm. He has been involved in all aspects of business management, but his primary talent is problem solving. His people skills combined with experience provided a platform for him to simplify both technical and non-technical concepts. He is a firm believer that technology supports operations.

Highly effective in:

- Business Operations
- Project Management
- Executive Sales
- Project Governance
- Business Continuity
- Bringing Applications to Market
- Technology Solutions
- Offshore Team Management
- Dealing with Investors
- Data Quality
- Mapping
- Systems Design
- Consumer Applications
- Data Driven Analytics
- Functional Requirements
- Problem Solving
- Spatial Data
- Communication Skills
- Presentation Skills
- Subscription Business Models

HIGHLIGHTED CAREER ACHIEVEMENTS

- 30 Years running his own Technology firm, specializing in Enterprise level applications. Oversaw all aspects of the business
- Consulted to many large companies to solve their business process problems including, logistics, operations, sales & marketing, and data analysis
- Created and managed both technical and non-technical offshore teams
- Vetted, performed due diligence, and evaluated M&A candidate companies
- Brought several mobile applications to market
- Experienced in enhancing data via spatial relationships and other data append methods
