

Sal A. Magnone – Enterprise Solutions Architect

30+ years Strategy, Technology and Leadership

Sal is a former cofounder, CEO, Turnaround CEO, CTO, and Chief Engineer. He was a consultant at PwC in the Financial Services CIO Advisory Practice.

Sal's is deeply experienced in systems "cannot fail" like the Federal Reserve's Fedwire and Dow Jones' Index Generation system.

Sal has had leadership and hands-on technology roles in multiple digital transformations.

Highlights

- 30+ years' experience as a cofounder, CEO, Turnaround CEO, CTO, and Chief Engineer
- Deep understanding and hands-on experience with high performance distributed computing, super-computing, low latency services, at scale machine learning, and cloud architectures
- Extensive experience of the core business processes of many industries – including financial services, healthcare, and defense.
- 12 years leadership experience in the US Army as a field artillery officer and in overseas combat and training units

Professional Experience

- Three startup exits at the cofounder level, currently a strategic advisor at a funded neo-bank.
- Served as turnaround CEO for a NYC based software company specializing in digital transformation and mobile UX/UI design where he grew the company from ~15 people to over in a brutal post-2008 business environment that saw many similar companies cease to operate
- Led and was responsible for the technology side of digital transformation at Voya Financial, delivered a newly designed enterprise data platform pulling together the entire firm's data sources (mainframes, apps, mobile) into a newly designed enterprise data lake, a new enterprise data warehouse and a new delivery platform
- Led the technology side of digital transformation efforts at Christies
- Led multiple digital transformation projects at Guardian Life
- Led the digital re-envisioning in client reporting at Bridgewater Associates
- Responsible for auditing the data platform and Java source powering the Federal Reserve's Fedwire
- x-PwC
