

Daniel Domanddoman@techpargroup.com

Tel: (917) 902-9684

CTO – COO – Infrastructure & Cloud Architect – Cloud Transformation & Strategy

Mr. Doman is a Strategic and Tactical Infrastructure and Cloud Architect skilled in designing and deploying real time improvements in large, complex, production environments for regulated businesses. He has extensive experience with Cloud infrastructure and security processes. Daniel is experienced implementing infrastructure as code, “building the airplane in flight” and “just-in-time engineering”, with a strong blend of business leadership and hands-on “practitioner” technical skills from start-ups to large organizations. He has over 25 years of technical leadership and IP development, more than 13 years of Cloud specific experience, large scale Cloud architecture & standards, migration, transformation, Hybrid, “Born On The Cloud”, Cloud Native, serverless, agile transformation, High Availability and Cloud security.

HIGHLIGHTED CAREER ACHIEVEMENTS

- Extensive knowledge of AWS/EC2 and Azure internals. Focus on security standards and processes for regulated industries and specific standards for containers, network, database and other PaaS offerings. Security for infrastructure as code Cloud models and best practice for Cloud. Extensive experience with 4 major Cloud platforms (AWS, Azure, Google, IBM) as well as on-premise virtualization.
- Extensive experience with organizational transformation required for Cloud migration. 7 years of experience with enterprise Cloud transformation and 5 years in the financial sector, security standards and encryption requirements to comply with domestic and global regulatory standards.
- Broad experience with evolving business models leveraging appropriate technologies. Extensive experience with Hybrid Cloud, senior management, infrastructure, operations, high-speed transaction processing, Service Oriented Architectures, internal and external API's, ERP, Data Warehouse, OLAP, e-commerce, video streaming and mobile.
- Extensive experience with extreme high-volume, robust and scalable architectures on new and legacy platforms using Grid, Cloud platforms, virtualization and other similar technologies. Equally at home with enterprise level application architecture and low-level system internals. More than 13 years of enterprise security standards, architecture and remediation.

EMPLOYMENT SUMMARY

Resperfecta	Jul 2020 – Present
Avanade	Feb 2019 – Jul 2020
Resperfecta	Jan 2007 – Feb 2019
IBM	Jun 2015 – Jul 2017
Qello	Oct 2010 – Aug 2011
BeyondtheRack	Jul 2009 – Oct 2010
Accoona	Jul 2006 – Oct 2007
Liberty Travel	Nov 2005 – Jul 2006
DirectRevenue	Jun 2004 – Aug 2005
Mediaport	Sep 2001 – Aug 2002
Quixi	Jan 2000 – May 2001
DoubleClick	Jan 1998 – Jan 2000
AIG	Feb 1997 – Dec 1997
Information Builders	Jul 1987 – Feb 1997
